**Summary**

Kimberly Mayer Watling introduced Joe Hayse, Chief Executive Director of the Peacekeeping Task Force (PKTF). The conversation focused on four initiatives that the PKTF is planning for the rest of 2025 and 2026, including:

- **Peaceful Operation Tenfold Shield** – This is a PKTF supported effort for ten states currently working on their standing and seatment, with a focus on the Militia Pillar for each Assembly. Michigan is one of those states being offered assistance. The idea is with ten states building together, this will provide unified strength and support. The **role of the Militia Coordinator** (time stamp 00:41:00): center point of the Militia Pillar; creates committees; focuses on membership (which is also the jury pool, which ties into the Jural Pillar), education, and inventories/provisions. The “How to Build an Assembly” handbook is also helpful for this endeavor.

Three hypothetical events for training purposes and observation:

- **Operation Lone Star Rescue (Texas)** – This is a simulation exercise planned for November involving Texas, with 64 participants. This does not involve Michigan but for those with radios, you can listen in to dispatch as the exercise unfolds. Go to <http://seeksearchfindtruth.blogspot.com/search?q=operation+lone+star+rescue> .
- **13 Original States** – This is an exercise for 2026 that involves the original 13 States, post American Civil Mercenary Conflict insertion of a Peacekeeping Task Force at that time. This does not involve Michigan but for those with radios, you can listen in to dispatch as the exercise unfolds.
- **All 50 States** – This exercise **WILL include Michigan**, along with the other 49 current States with the focus of a current potential Mercenary Conflict 2.0. This event will also occur in 2026. More details to come...

**Conclusion**

Keep plugging away with building our four pillars, Michigan Assembly – the PKTF is available to assist with coordinating with other states if Michigan is interested, especially with our Militia Pillar. The three hypothetical events will be for observation and education.
